Professional Summary

Data analytics and supply chain professional with 3+ years of experience in 3PL operations, inventory management, client reporting, and business analysis. Skilled in SQL, Power BI, Python, and Microsoft Excel, with experience in dashboard development, KPI reporting, and inventory analytics.

Technical Skills

Languages: Python (Pandas, NumPy), SQL
BI & Viz: Power BI Desktop & Service, DAX, Google BigQuery
Data Skills: ETL, Data Modeling, Data Warehousing, EDA
Tools: Excel, Git & GitHub, SharePoint

Experience

NRI 3PL

Kamloops, BC, Canada

Client Services Coordinator | Data Analytics & Reporting

Aug 2023 – May 2025

- Reduced reporting time by 6 hours weekly by developing Power BI dashboards tracking fill rate, backorders, inventory accuracy, and order delays.
- Lowered inventory variances by 15% by using SQL and operational reporting to identify recurring stock discrepancy and fulfillment trends.
- Minimized fulfillment-related client escalations by 10% by building a centralized order-resolution tracker in SharePoint to sync warehouse operations with client-facing teams.

Inventory Lead

Aug 2022 – July 2023

- Increased inventory accuracy by 9% and reduced stock discrepancies by 14% by strengthening inventory tracking, reconciliation, and cycle count processes.
- Boosted operational efficiency by 11% by using SQL and Excel to identify stock variance patterns and recurring inventory issues.
- Maintained inventory accuracy across high-volume SKUs by leading cycle counts, resolving stock discrepancies, and coordinating inventory reconciliation activities with warehouse teams.

Projects

Enterprise Sales Data Warehouse and Analytics Project | *SQL* | [GitHub](#)

- Enabled analysis across 29.3M in sales, 27.6K orders, and 18.4K customers by designing an end-to-end enterprise sales data warehouse with a medallion architecture for ERP and CRM data.
- Strengthened category-level revenue visibility by identifying Bikes as the primary revenue driver with 96.46% of total sales through analysis of 4 years of customer, product, regional, and sales data.
- Enhanced customer and product visibility by segmenting 18.4K customers into VIP, Regular, and New groups and classifying products into high-, mid-, and low-performing categories.
- Streamlined business reporting by reducing manual data retrieval from hours to seconds through the design of reusable SQL views for customer and product metrics.

Regional Sales & Customer Performance Analytics | *Power BI Desktop & Service* | [GitHub](#)

- Delivered stakeholder self-service reporting across 6 markets by designing a 4-page Power BI dashboard tracking \$24.91M revenue, \$10.5M profit, and 25.2K orders.
- Optimized pricing and inventory decisions by identifying a decline in revenue per customer to \$1,431 through the development of complex SQL queries and performance flagging filters.
- Enabled leadership to model revenue scenarios across a \$1.83M monthly baseline by building what-if analysis and price adjustment parameters in Power BI.

Education

Thompson Rivers University

BC, Canada

Postgraduate Diploma, Supply Chain Management

2021 – 2023

Navarachana University

Vadodara, Gujarat

Bachelor of Technology in Civil Engineering

2014 – 2018
